- HTML5
- JavaScript
- Bootstrap
- Laravel
- Ajax
- NextJs
- ExpressJs
- MySQL
- Git
- CSS3
- PHP
- TailwindCss
- JQuery
- ReactJs
- NodeJs
- SQL
- MongoDB
- Github

Profile

I started to learn web development in 2021 with self-learning. After a few months, I became passionate about web development. So, I continued learning it. I studied online courses. I created some projects by myself learning online courses. Then I worked as a junior web developer at a local company for over a year. I had built many projects using Javascript and PHP (Laravel) then. I am currently learning Flutter and NestJs, and building some projects using programming tools that I have learned.

Languages

Myanmar • English

Education

First Year

West Yangon University

(I just stopped going to school at the moment)

02/2020 - 2020

Yangon, Myanmar

Interests

- Travelling
- Bicycling
- Watching Films

Professional Experience

Great Save Security / Employees Attendance and Payroll System Project

10/2023 -
02/2024

Demo 

Super admin can control all role & permission and whole system (Attendance System (Present, Overtime, Leave, Absent, Resign), Employee Payrolls System and etc ...). Supervisor or other role users can manage systems according to his or her role & permission. And application is for supervisor or user who can manage Employee Attendance System.

PHP, Laravel, FilamentPHP, MySql, TailwindCss and Flutter

Myanmar Tennis Federation

11/2023 -
03/2024

Demo 

Super admin can control all role & permission and whole system (Managing of Role & Permission, Courts, Timeslots, Facilities, Bookings and etc ..). User can choose available time, courts, coach and etc as he like to book and then he can pay by KBZPay.

PHP, Laravel, FilamentPHP, MySql, TailwindCss for dashboard, NextJs, TailwindCss for PWA and KBZPay Payment System

Ninja HR / Employee Management System Project

2023 - 2023

Github 

User can login by fingerprint or password and add attendance by pincode or QRSCAN. User can manage Payroll system, Attendance system, Project Management system (Creating project, Assigning task to member, etc...) and etc... according to role & permission. I used a lot of plugins (Larapass (fingerprint), Javascript image viewer, SortableJS, etc ...) in this project.

HTML, Css, Bootstrap, Javascript, PHP, MySql, Laravel, JQuery and Ajax

Magic Pay / Mini E-Wallet Project

01/2023 -
05/2023

Github  Demo 

User can transfer money to another by Scanning QR or manually. I provided apis in this project and then rebuilt website for user using Reactjs, ReduxToolkit and TailwindCss.

HTML, Css, Bootstrap, Javascript, PHP, MySql, Laravel, JQuery and Ajax

Chatting App

06/2023 -
08/2023

Github  Demo 

User can communicate each other by private chat or group chat.

Reactjs, ReduxToolkit, TailwindCss, Nodejs / Express and MongoDB

Export

Github [↗](#) Demo [↗](#)

User can use it to export PDF or print for personal or small sale business.

Reactjs and TailwindCss
